A guide to understanding your oncology medicine cover

We know how important it is to feel supported and informed as you navigate your cancer treatment. That's why we've made it easier for you to understand how your oncology medicine is covered through the discovery health medical scheme.

The *oncology preferred product list* includes a list of medicines that are covered across all health plans, unless otherwise stated. Please note that you may need to get your medicine from a designated service provider to avoid a 20% co-payment. You can easily find designated service providers in the discovery health app or on our website, www.discovery.co.za, under medical aid > find a healthcare provider.

We've also introduced oncology reference pricing – this includes generic reference pricing for supportive medicines, chemotherapy and hormone therapy. These prices apply to the drug molecules listed on the *oncology preferred product list*. This ensures that you continue receiving high-quality, cost-effective care.

It's important to remember:

- The oncology programme has specific rules and benefit conditions. You can familiarise yourself with these in the *scheme rules* and *oncology benefit guide*, available on www.discovery.co.za.
- Any advice or guidance we provide is meant to support – not replace – the expert care of your doctor, pharmacist or healthcare team.
- The information in this document may change as we update benefits or pricing, and we'll always communicate these changes clearly. You'll find the most up-to-date version of this list on our website under medical aid > find documents and certificates.

We're here to ensure you get the best possible care, with support you can rely on throughout your treatment journey.
